FIRST CLASS PARKING

Smart Parking be.instance

be.instance is a cloud service developed by bebarmatic for the smart control of all components of the Platinum Modular parking management system.

- Create season tickets and tickets, query cash balances, view occupancy statistics - very simple and smart from home and on the road.
- Hosted cloud solution optionally suitable for systems without fixed IP addresses.
- Forwarding of the parking management software be.Web.
- Possibility of completely substituting a data centre.
- Higher-level master with the option of expansion to a virtual control centre.
- Proactive support tool that prepares error messages that can be processed as a service by bebarmatic without further contact.
- Simplified execution of updates of the plant software as well as remote maintenance.
- Possibility of staff training by the Customer Care division.

Fields of application

- Shopping and malls
- Banks and savings banks
- Clinics and medical centres
- Retail
- Industry
- Hotel and gastronomy
- Service provider
- Leisure facilities
- Events and functions
