FIRST CLASS PARKING

Discount encoder Platinum Modular

The discount encoder Platinum Modular has been designed for offline discounting and activation of tickets without cable connection to the parking space management system. It is ideally suited to be applied in shopping centers and hyper markets.

- Module for direct thermal print of value barcodes on the parking ticket
- Extremely fast processing (< 1 second)
- 4 freely selectable and cumulative discounts per discount encoder
- No limitation of discount encoders per application site
- Fully integrated into the parking space management software
- Transparent presentation of granted discounts
- Shift report including automatic reset of the single shift termination
- Tamper-proof and audit compliant via non-resettable service counter
- Secured against attempts to defraud (no mark or punch codes)
- Position identification of parking tickets via light barrier (trouble-free handling)
- Elegant and compact desktop casing made of white coated aluminium
- Display of operating mode via 3 LED

Technical data

Power supply	230V / 50Hz plug-in power supply
Power input	max. 70 Watt
Weight	Ca. 1,4 kg
Protection class	IP20
Operating temperature	0° up to +55° C
Humidity	Up to 90% (noncondensing)
Dimensions (WxHxD)	121x108x141mm

Areas of application

- Shopping centres / hyper markets
- Banks and saving banks
- Medical centres
- Retail trade
- Hotel sector and catering
- Service providers
- Recreational facilities
